Decoding older chainsaw serial numbers

Husqvarna phone support job aid · Saws through 1999 · Redesign of Jeffrey Segler's 2019 original

First, get all three:
1. Tag color
2. Serial number (S/N)
3. Top casing color

Reading a silver-tag or 7-digit S/N: digit 1 = last digit of the year (the chart gives the decade); digits 2–3 = week.
Example: 314xxxx with a black top = week 14 of 1983.

Tag says TOMOS, Yugoslavia or Slovenia?
Licensed build. This chart doesn't apply.
Yugoslavia: before about 1991
Slovenia: 1991 or later
Exact date: Escalate.

6-digit S/N? Made in the 1960s–'70s, before numbering was standardized. Give the customer that range, then escalate.

Tag missing or unreadable, or any other digit count? Escalate.
